BUSINESS PROPOSAL

Smart Hotel Automation

for **Regal Hotel, Ajmer**

WhatsApp booking · Channel sync · Guest experience · Owner dashboard

24×7	15–20%	10 weeks
instant replies to guests on WhatsApp	OTA commission saved on every booking moved to direct	to full go-live, in 3 phases

Prepared for	**The Owner / Management, Regal Hotel** Opp. Gurudwara, Dargah Road, Ajmer, Rajasthan
Prepared by	[Your Company Name] · [Your Name]

Date	30 October 2026
Reference	RGL-AUTO-2026-01 · Valid for 30 days

01 Executive Summary

Regal Hotel has a strong advantage: it is a short walk from Dargah Sharif and about 1 km from Ajmer Railway Station. Demand is steady all year and rises sharply on Thursdays and Fridays, during **Urs Sharif** and during **Pushkar Mela**.

Many guests, especially pilgrims and families, decide late and contact the hotel by phone or WhatsApp. A large share of bookings also come through Booking.com, MakeMyTrip, Goibibo and Agoda, each charging a commission on every room night.

We propose a set of automations that:

- **Answer every guest enquiry instantly** on WhatsApp, 24 hours a day, and take bookings with UPI advance payment.
- **Move more bookings to direct**, saving OTA commission on each one.
- **Keep room availability and rates in sync** across all booking sites, preventing overbooking, with event-based pricing for Urs, Pushkar Mela and weekends.
- **Improve the guest experience**: online pre-check-in, QR room service from Riviera Restaurant, faster housekeeping.
- **Raise online ratings** by sending happy guests to Google and alerting the manager privately about unhappy ones.
- **Give the owner a daily WhatsApp report** and a live dashboard of rooms, revenue and staff.

> **Live demo available.** A working, clickable demo of these modules has been prepared with sample data. It shows exactly how the system will look and behave for Regal Hotel before any investment is made.

02 Our Understanding of Regal Hotel

Area	Details
Property	About 48 air-conditioned rooms, 24-hour front desk, free Wi-Fi and free on-site parking
Location	Dargah Road, opposite the Gurudwara · ~400 m from Dargah Sharif · ~1 km from Ajmer Railway Station
Food & beverage	Riviera Restaurant (breakfast, lunch, dinner) and 24-hour room service
Sales channels	Walk-in / phone, and online travel agencies (Booking.com, Hotels.com/Expedia, Agoda and others)
Main guest segments	Pilgrims visiting Dargah Sharif, families, Pushkar visitors, business and transit travellers
Demand peaks	Urs Sharif (Rajab), Pushkar Mela (Kartik), Thursdays (Jumeraat) and Fridays, long weekends and holidays

Source: public hotel listings. Room count and facilities to be confirmed with management during the kick-off meeting.

03 Challenges We Aim to Solve

Common for hotels of this size and location; to be confirmed with your team in week 1.

Challenge	Business impact
Phone and WhatsApp enquiries missed at night or during rush hours	Guests book elsewhere. Lost revenue that is never measured.
High dependence on OTAs	15–20% commission on each OTA booking, plus less control over the guest relationship.
Updating rooms and rates on each OTA separately	Overbooking risk, and rates not raised in time for Urs and weekends.
Manual registers for check-in, ID and Form C (foreign guests)	Slow check-in queues and compliance risk.
Room service orders by phone, housekeeping tracked verbally	Missed orders, unbilled items, rooms not ready when the next guest arrives.
Online reviews not actively managed	A few negative reviews pull down the rating and the hotel's ranking on Google and OTAs.
No single view of daily performance	The owner has to call the desk to know occupancy, revenue and issues.

04 The Guest Journey After Automation

Enquiry Guest messages on WhatsApp at 11 PM. Bot replies in 2 seconds. ›

Booking Picks dates and room, pays 30% via UPI, gets booking ID. ›

Before arrival Reminder, ID upload, station pickup offer. ›

Stay 2-minute check-in, QR room service, quick repairs. ›

Check-out Invoice on WhatsApp, room auto-assigned for cleaning. ›

After stay Feedback, Google review, offers for next Urs.

Example: one booking, before and after

Step	Today (manual)	With automation
Enquiry at night	Call missed or answered late	Instant WhatsApp reply with rates and photos
Availability	Staff checks register / OTA extranets	Live availability from one system
Payment	Pay at hotel; no-show risk	UPI advance; booking confirmed automatically
Check-in	Fill register, photocopy ID, 10+ minutes	ID already uploaded; under 2 minutes
After stay	No contact	Feedback, review request, repeat-visit offers

05 Proposed Solution: 8 Modules

1. WhatsApp Booking Bot

Replies instantly in English and Hindi. Shares rates, photos, location and checks live availability. Takes a UPI advance and sends the booking confirmation and invoice. Hands complex chats to reception.

2. Channel Manager Sync

One place to update rooms and rates. Booking.com, MakeMyTrip, Goibibo, Agoda and the WhatsApp bot stay in sync, so a room sold on one channel closes on the others.

3. Event-based Pricing

Suggested rates for every date based on Urs, Pushkar Mela, Thursday/Friday demand and occupancy. The owner approves with one tap; rates go live everywhere.

4. Pre-check-in & Form C

Guests upload ID before arrival on WhatsApp. Check-in takes under 2 minutes. Form C details for foreign guests are prepared automatically.

5. QR Room Service

A QR code in each room opens the Riviera menu. Orders go to a kitchen screen and are added to the room bill automatically.

6. Housekeeping & Maintenance

Check-out creates a cleaning task for the least busy staff member. Repair tickets (AC, geyser, TV) go to maintenance on WhatsApp. Room status updates live.

7. Review & Feedback Automation

Feedback request after check-out. 4–5★ guests are sent to Google Reviews; 1–3★ guests alert the manager privately. AI-drafted replies to public reviews.

8. Owner Dashboard & Daily Report

Live room map, occupancy, revenue, booking sources and ratings. A summary is sent to the owner's WhatsApp every night.

06 Technology & Data Security

Component	Proposed technology
WhatsApp	Official WhatsApp Business Platform (Meta), using a verified business number with a green-tick application where eligible
Channel manager / PMS	Integrate with the hotel's existing software if any. Otherwise we recommend an established Indian provider (e.g. eZee, STAAH or Hotelogix) and connect it.
Payments	Razorpay / Cashfree payment links (UPI, cards, net banking). Money goes directly to the hotel's bank account.
Automation engine	Workflow automation (n8n) and cloud functions hosted in an Indian data centre
Dashboard & QR menu	Mobile-friendly web app. Works on any phone, tablet or desktop; no installation.
Reviews	Google Business Profile integration; AI-drafted replies that the manager approves before posting

Data protection. Guest ID documents are stored encrypted with role-based access, and are deleted after the legally required retention period. Guests give consent before they receive WhatsApp messages. The setup follows India's Digital Personal Data Protection (DPDP) Act, 2023. The hotel owns all its data and can export it at any time.

07 Implementation Plan

We deliver in three phases so that the hotel starts benefiting in the first month, and each phase is paid for only when it's delivered.

Phase 1 · Weeks 1–3 · Quick wins

WhatsApp bot | UPI payments | Review automation | Daily owner report

Kick-off meeting, WhatsApp Business API setup and number verification, bot content in English and Hindi, payment gateway, Google review flow, nightly report. **Go-live at end of week 3.**

Phase 2 · Weeks 4–7 · Revenue

Channel manager | Event pricing | Pre-check-in & Form C

Connect OTAs through the channel manager, load rate plans and the event calendar (Urs, Pushkar Mela), digital ID upload and Form C workflow.

Phase 3 · Weeks 8–10 · Operations

QR room service | Housekeeping | Owner dashboard

Digital menu for Riviera Restaurant and kitchen screen, QR codes printed for all rooms, housekeeping and maintenance task app, live dashboard.

Training & handover · Week 10

Hands-on training for front desk, kitchen and housekeeping staff (in Hindi), simple user guides, and 30 days of close support after go-live.

What we need from Regal Hotel

- A dedicated mobile number for WhatsApp Business (can be the existing hotel number), and business documents for Meta verification (GST certificate or similar)
- Room types, rates, policies and good-quality photos
- Access to OTA extranet accounts and the current software/register, if any
- Riviera Restaurant menu with prices
- A single point of contact (manager) and 1–2 hours a week of their time during setup

08 Investment

Choose the package that fits the hotel today. You can start with Starter and upgrade later without losing any setup work.

Starter

₹35,000

one-time setup
+ ₹4,000 / month

- WhatsApp booking bot (EN + HI)
- UPI advance payments
- Review & feedback automation
- Daily owner WhatsApp report

Modules 1, 7, 8 (report)

RECOMMENDED

Growth

₹75,000

one-time setup
+ ₹7,500 / month

- Everything in Starter
- Channel manager integration
- Event-based pricing
- Pre-check-in & Form C

Modules 1–4, 7, 8 (report)

Complete

₹1,40,000

one-time setup
+ ₹12,000 / month

- Everything in Growth
- QR room service + kitchen screen
- Housekeeping & maintenance app
- Full owner dashboard

All 8 modules

Prices exclude GST (18%). Monthly fee covers hosting, monitoring, updates, minor content changes and support.

Third-party costs (paid directly by the hotel, at actual)

Item	Notes
WhatsApp messaging charges	Meta charges per message for business-initiated messages (reminders, feedback, offers). Replies to guest enquiries within 24 hours are mostly free. Typically a small monthly amount for a 48-room hotel.
Channel manager subscription	Only if the hotel does not already have one. Paid to the provider (Growth & Complete).
Payment gateway fee	As per gateway's standard rates, deducted per transaction.
Kitchen tablet, QR stickers	One Android tablet for the kitchen and printed QR stands for rooms (Complete).

Payment terms

- 40% of setup fee on signing, 30% at Phase 1 go-live, 30% at final handover
- Monthly fee starts from the month after Phase 1 go-live
- Minimum term 12 months for the monthly service; cancel with 30 days' notice after that

09 Expected Return on Investment

An illustrative calculation using conservative assumptions. We will replace these with the hotel's real numbers after the kick-off meeting.

Assumption	Value
Average room rate	₹2,200 / night
Average OTA commission	18%
Room nights moved from OTA to direct WhatsApp booking	100 per month (~7% of capacity)
Extra room nights from enquiries that are missed today	20 per month
Extra room-service sales from QR ordering	₹15,000 per month

Monthly benefit	Amount
OTA commission saved (100 × ₹2,200 × 18%)	₹39,600
Additional room revenue (20 × ₹2,200)	₹44,000
Additional F&B revenue (Complete package)	₹15,000
Total estimated monthly benefit	**~₹98,600**

> With the **Growth** package (₹75,000 + ₹7,500/month), commission savings and extra bookings alone (~₹83,600/month) would recover the setup cost in about **one month** of full operation. This excludes the gains from higher Urs pricing, better ratings, and staff time saved.

These are estimates, not guarantees. Actual results depend on season, pricing and how actively the hotel promotes its WhatsApp number.

10 How We Measure Success

KPI	Starting point	Target after 6 months
Share of direct (non-OTA) bookings	Measured in week 1	+15 percentage points
Average first-reply time on WhatsApp	Measured in week 1	Under 1 minute, 24×7
Google rating	Current rating	+0.3 stars
Number of Google reviews	Current count	+150 new reviews
Average check-in time	Measured in week 1	Under 2 minutes
Overbookings	Current count	Zero

11 Support & Service Levels

Item	Commitment
Support hours	9 AM – 9 PM, all days, on WhatsApp and phone. Critical issues handled 24×7 during Urs.
Response time	Critical (bot or bookings down): 1 hour · Normal: same day
Uptime	99.5% monthly target for the bot and dashboard, with monitoring and alerts
Updates	Seasonal content (Urs, Pushkar, festival offers) and minor menu/rate changes included
Reviews	Monthly performance report and a quarterly review meeting with the owner

12 Next Steps

1. **Live demo walkthrough** (30 minutes) with the owner and manager, using the clickable demo.
2. **Choose a package** and confirm any changes to scope.
3. **Sign the agreement** and start the kick-off meeting the same week.
4. **Phase 1 goes live in 3 weeks**, in time for the upcoming Pushkar Mela and Urs season.

> **Why start now?** Pushkar Mela and Urs Sharif are among the busiest weeks of the year for Ajmer hotels. Having the WhatsApp bot and event pricing live before these peaks captures the most value in the first months.

Acceptance

Package selected: ☐ Starter ☐ Growth ☐ Complete
